And I know how to do things and I had that I can take care just as well, but the white men here on our reservation are supposed to look after all these things. They are not doing their duty. I asked that the government are just given the money for nothing. That's a way of trickery.

John Andrews

I am going tell you are that we are just the same. I had been pressed down here on the Salt River and reservation, like just are same. I like to know how. This things are going. Raise up, we held the first meeting and try to talk over, we like to heard from you know, about that some white man had been here on our reservation from Washington D.C. They say that were Congressmen. And nobody knew what they wore for in our reservation.
The Indians are trying out about it and nobody knew it. That was very
just all about it. I wish that you
could let us know what they are for.
I will stop my writing to
our friends.

A good by.

Yours truly,

Joe Cootie.

Address Joe King—When you
mailed back.
Salt River.

My friend C.M.,

June 13, 1920.

It was a long time & heart-sickning wait to you. As I am going to try you about our reservation. Everything are just same it was before, you know, how our things are going on the farms and reservations. But I had said the first time that you are going stand for our rights, and to we take care of ourself here on our reservation. You for kids, I am wishes that are going to help me on our rights about the land and water. I know long time ago when we had planted water had been used for our land. But now the water are very scarce. And that some all head of water are use for the 3 to 5 acres of land.
