THE ARIZONA REPUBLIC
The committee had much to accomplish. The country
was divided over how to proceed. The 3.9 million
loan was given, but a committee was formed for
the improvement of AVS. Their role is to promote
the education of science, technology, and
engineering. They aim to increase the
participation of women in these fields.

In a meeting, a member said, "We need to
increase the number of female scientists."

Another member replied, "We need to make
more opportunities for women."

A third member added, "We need to
increase the diversity in STEM fields."

The committee felt that they had
accomplished a lot, but there was still
much more to do.
